within 3 mi	5	9
within 5 mi	11	16

*"Both" sites are counted in both columns.

How to read this: start with B1–B3. Call them before your first pickup at the supply site to learn what they pay and which sizes they take. S-numbered sites are extra pickups you can add to the same loop.

Fit score (0–10) weighs role, site size (20–250 staff scores best) and address confidence. Ranking: distance band first, then fit.

Distances are straight-line, not driving miles. ≈ means the site location is approximate (ZIP-level). "Buyer" means the business type typically uses or buys pallets; it is not a purchase offer, so call to check what each site accepts and pays. Compiled from public business records and company websites. Always ask permission before collecting any pallets.
